

# MicroSim Framework

**Learning Gap/Recent Practice Changes:** *Review of Safety Events, documented safety concerns, commonly occurring mistakes, ideas from staff, etc.*

---

**Learning Objectives:** *Pick at least 2 objectives you want learners to walk away with*

---

**Review Content with Subject Matter Expert(s):** *To confirm accuracy and minimize ambiguity*

---

**Supplies Needed:**

---

**Resources:** *What written resources should staff utilize / refer to*

---

# Scenario Building

*Brief description of scenario background, sequence of events, and scenario end*

**Scenario Background:** *What would be an appropriate patient for the listed learning objectives? Consider age, weight, history, and admission reason. What brings the participants to the patient?*

**Stage 1:** *Assess, recognize situation needs, necessary escalations, anticipated interventions*

Vital Signs
