### Feedback – Participants

- "3 year old is a brain cancer warrior, so we go to the hospital frequently. His anxiety has been really tough- like the second we get in the parking garage at Inova, he starts freaking out. As a parent, I've been brainstorming ways to desensitize his appointments and **this event was PERFECT!** The stuffies kept it low stress and we saw some familiar faces from Child Life. Even hours after the event, he keeps asking to go back to the "animal doctor." Amazing event; well organized; friendly staff/volunteers. **Please do this every year!**"
- "This event was so cute and it far exceeded my expectations. I thought the staff were just going to check their vitals. I had no idea it would be so thorough and educational. My son has been saying that his Bear was sick for the past few months. Being able to take his best friend to the real doctor to be treated made his heart full. **The event was professional and well organized.** I truly hope this becomes an annual event. Thank you! ❤️"
- "Thank you so much for doing this! **It exceeded our expectations.**"
- "The Teddy bear clinic was amazingly planned and executed. I believe my **kids feel more comfortable with hospital now.**"

### Feedback – Clinicians

- "The creative names the kids had for their stuffed animals and how happy and proud the kids were to get their animal checked in with a wristband."
- "I really enjoyed the interaction with the patients and parents. It was such a great experience, and I felt like the kids and parents were really engaged in the experience."
- "The smiles on the kids faces and all the stories they had on how we helped their babies."

Will you volunteer again?

● Yes ● No
