

Challenge 1 Lack of specific strategies and Knowledge Personally...it helps me to understand. Like, what's going on...even just like defining what autism is and how it's diagnosed. What are the criteria . . . even just understanding...what's going on in their brain and what are the symptoms or things that are part of the diagnosis? -Quinn

Strategies In person Education Emphasis on practical knowledge Patho-Physiology Hands-On Skills Development Open Forum Style Q&A Aim to Reduce Stigma

Strategies

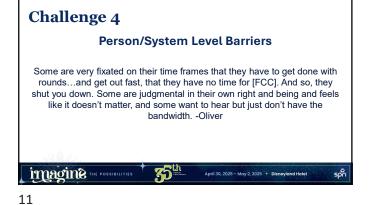

- Parent Engagement
- · Personalization of Care
 - · Interprofessional Support and Collaboration
 - Bedside Adaptations
- · Potential Hospital Level Resources

8

Challenge 3 Communication Barriers and Challenges It can feel stressful. Sometimes you feel like a detective, like trying to put all the pieces together to, like, see the whole picture, you know? So, I definitely feel like sometimes it feels. Yeah, like, frustrating in the sense that you're having to, like, search to, like, search out the answers. -Quinn
